

Guidelines for enrolment for helping register

Patellas - maximum sum 1 (eg. 0/0, 0/1, 1/0)

Teeth – all sets of teeth, maximum of missing teeth: 1x P1 + M3

Bite - scissor

Height & weight – only ideal: 21-23cm, weight proportional to the height

Mating list is issued only with restricted validity.

Partner of an animal from helping register can only be a female / male dog with full pedigree.

Presentation of 1 – 2 litters (2nd litter only in case of death – disappearance of a puppy from the 1st litter.) – otherwise second mating list will not be issued.

Mating for the 2nd litter can be performed before the presentation of the 1st litter at Bonitace evaluation.

A new mating list will not be issued in case of an occurrence of exclusive defects of the litter.

Minimum mark from two exhibitions should be VG – Very Good. The exhibition must be either club or special exhibition with an international judge.

Guidelines for Selective Litter:

Patellas - maximum sum 1 (eg. 0/0, 0/1, 1/0)

Should the litter be classified as a Selective Litter the sum of the patella degrees in pairs mustn't exceed 1 (eg. 0/0x0/0, 0/1x0/0, 0/0x0/1)

Height & weight – only ideal: 21-23cm, weight proportional to the height

Teeth – all sets of teeth, maximum of missing teeth: 4x P1 a M3

Bite - scissor

Ears – naturally upright

Without white marks in any PK colour variety

2x Excellent mark in an exhibiting category from 15 months
